HARSHAD BAPU DHOMASE

harshaddhomase307@gmail.com | +91-8767316799 | github | linkedin.com

PROFESSIONAL SUMMARY

Enthusiastic Computer Engineering student with a strong foundation in Java, Python, Data Structures & Algorithms, HTML, CSS, JavaScript, MySQL, and Object-Oriented Programming. Hands-on experience developing academic web and AI/ML projects with a passion for building practical software solutions. AWS Foundations certified with strong analytical, problem-solving, communication, and teamwork skills. Eager to begin a Software Developer career and contribute to innovative, high-quality applications while continuously learning new technologies.

EDUCATION

Pune Vidyarthi Griha's College of Engineering, Nashik *2023 – 2027*

Bachelor of Engineering (B.E.) in Computer Engineering Savitribai Phule Pune University (SPPU)

SKILLS

Programming Languages: Java, JavaScript, Python, C++

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems (OS), Computer Networks (CN)

Web Technologies: HTML5, CSS3, Bootstrap, React.js (Basics)

Databases: SQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Postman, Terminal, Streamlit

Coursework: Software Engineering, Machine Learning Fundamentals

EXPERIENCE / INTERNSHIP

Data Science & AI/ML Intern — SupraTech AI Solutions and Innovations *Nashik | Jan 2026 – Feb 2026*

- Developed machine learning models using Linear Regression, Logistic Regression, and K-Means Clustering with Python and Scikit-learn.
- Built predictive analytics projects including Crop Prediction, House Price Prediction, Spotify Churn Analysis, and Customer Segmentation.
- Applied data preprocessing, feature engineering, and model evaluation; explored Retrieval-Augmented Generation (RAG) fundamentals.

PROJECTS

Crop Recommendation System

Python, Scikit-learn, Machine Learning

- Built a machine learning model to recommend the most suitable crop based on soil nutrients, rainfall, temperature, and humidity data.
- Performed data cleaning, feature engineering, and model evaluation to improve prediction accuracy.
- Applied classification algorithms using Scikit-learn to deliver actionable, real-world recommendations.

Currency Converter Application

Python, API Integration

- Developed a real-time currency converter application that fetches live exchange rates via API integration.
- Designed clean, reusable functions for currency conversion logic, handling multiple currency pairs and edge cases.
- Implemented input validation and error handling to ensure reliable performance.

CERTIFICATIONS

- AWS Foundations: Securing Your AWS Cloud
- Programming Fundamentals using Java — Infosys Springboard
